

## Gothic grammar, with selections for reading and a glossary

In the course of my lectures on Gothic Grammar I long ago felt the need for an outline being in the hands of my hearers, in order to enable them to take up the study of the Gothic language for themselves. There was required for this a clear representation of Phonology and Etymology, giving a view of the language as far as possible by itself without admixture of scraps from Comparative Grammar. For, an understanding of the Germano-Gothic Grammar from a scientific point of view can certainly not be obtained from an outline, and unsystematic remarks must needs confuse the beginner, quite irrespective of the fact that in the manuals commonly used, the science of language stands on a rather antiquated basis. The present Grammar will thus also enable him who is ignorant of Comparative Grammar to learn Gothic. Pre-historic questions have therefore been as far as possible avoided, or where this could not entirely be done, treated only from a purely Gothic point of view. Reference has rather been made to another Germanic dialect, e.g. the Old High German. It has been found necessary to leave over for lectures the scientific explanation of the facts stated in the Grammar. It is also another purpose of this book to serve as a basis for these lectures, and to this in its preparation constant attention has been given. It will be seen that the somewhat detailed treatment of Phonology is largely influenced by this consideration, since, for instance, such examples under the Consonants have been chosen as can be made use of in the demonstration of the Lautverschiebung. Interesting shifting or Permutation of Consonants. The former (erm is used by March, the latter by Whilney. (Typographical errors above are due to OCR software and do not occur in the book.) I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
