

Semitic Languages in Contact (Studies in Semitic Languages and Linguistics)

Semitic Languages in Contact contains twenty case studies analysing various contact situations involving Semitic languages. The languages treated span from ancient Semitic languages, such as Akkadian, Aramaic, Classical Ethiopic, Hebrew, Phoenician, and Ugaritic, to modern ones, including languages/dialects belonging to the Modern Arabic, Modern South Arabian, Neo-Aramaic, and Neo-Ethiopian branches of the Semitic family. The topics discussed include writing systems, phonology, morphology, syntax, and lexicon. The approaches range from traditional philology to more theoretically-driven linguistics. These diverse studies are united by the theme of language contact. Thus, the volume aims to provide the status quaestionis of the study of language contact among the Semitic languages. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
