

# Teach Yourself A Foreign Language - Methods For Accelerating Language Learning

With the advent of technologies, language learning programs have evolved over the last 20 years. Never before has it been so easy to learn a language outside of a classroom. Language learners have at their disposal a variety of language learning tools, both free and paid. But which of these methods really help you to learn a language? What's the best way to learn a language with the least amount of time, effort and investment? If you are interested in learning a new language, but you feel overwhelmed by all the options and the process, then Teach Yourself A Foreign Language - Methods For Accelerating Language Learning is for you. I spent years teaching myself Spanish, on a budget and on my own. Along the way, I learned which methods were the most helpful, and which were a waste of my time. When I realized that these methods are applicable to any language, I decided to write this book. Teach Yourself A Foreign Language will walk you through the steps of language learning, from beginner to advanced level, and provide you with the tools and resources so you can learn a language as quickly and efficiently as possible. Although those who just want to learn some basic vocabulary words may benefit from this information, it is essentially designed for those who are interested in achieving a higher level of fluency in their target language. Some of the topics covered: --Study abroad and immersion programs --Study management tips --Individualizing your learning --Useful tips for beginners --Resources for intermediate and advanced level students --Tips for staying motivated --How to understand native speakers --What are the best uses of Rosetta Stone --Creating your own language learning products PLUS a unique method that I developed to rapidly accelerate your language learning.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
