

The Digital Practices of African Americans: An Approach to Studying Cultural Change in the Information Society (Digital Formations)

How do social scientists study the impact of social networking sites on racial identity formation? How has the Internet impacted the accumulation of social and cultural capital? By synthesizing insights across a variety of disciplines, this book builds an original theoretical perspective through which these and other questions about core social processes can be addressed. Three case studies of how African Americans use information and communication technologies (ICTs) are used to illustrate this theoretical perspective. They show how groups can leverage ICTs to overcome historical inequalities. The book argues that the lenses through which scholars and society's leaders think about new technology place too much emphasis on the technological and economic aspects of ICTs, and not enough on the impact of ICTs on social processes at the everyday level.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
