

In the First Societies We Find: Great Secrets for Success

The book helps you to see through our modern society. Where did it originate and how did it become so complex? What are the alternatives to it? Where do we find the most harmonious ways of life? These are a pressing questions for many people as we are in a time of Awakening in the world. A great part of our history our forefathers spent as hunter-gatherers. They had to walk after food, on their feet. Simply put, we could say that this was the Age of the Feet. The Age of the Hands followed and, much later, the Age of Elbows, that is, industrialization, with all its social mobility and ambition. Fairly recently, we entered the Age of the Head when computers arrived. What will come next? Chaos or enlightenment? As we moved up in this way, 5 kinds of society appeared in an intriguing process. Each society had its own and rather astonishing leader archetype. Even to this day we find remnants of the 5 archetypes everywhere in our social life. The book is interactive and the reader himself will come to revealing conclusions. He becomes a co-creator of insights which have not been discovered before.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
