Egyptian Languages , provides the linguistic evidence that confirms the hypothesis of Cheikh Anta Diop, L. Homburger, M. Delafosse that the Niger-Congo speakers and Egyptians had a common origin. In this book we argue that many Egyptians living in the 22 sepats of Upper Egypt spoke Niger-Congo languages including the Bantu Fulani and Mande languages. Egyptian Languages , provides the genetic, linguistic and archaeological evidence relating to the diverse Niger-Congo speakers who made up segments of the Egyptian nation. Readers of this book will learn that the Niger-Congo speakers originated in the Highland regions of Middle Africa: the Mountains of the Moon ; and that this population which later settled Upper Egypt, formerly belonged to the Ounanian culture.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
