Note: Easy Chinese Basic Text and Workbook, Mandarin Level II is now available. If you are interested in buying both book and CD-ROM together, please refer to ISBN# 0966163648. Easy Chinese Tutor (Level Two), is the second course of the Easy Chinese Tutor series. Like the first course, it is designed for those who want to learn the Chinese language on their own with the help of a computer. As an individualized tutorial program, ECTutor can also be flexibly used to supplemental regular instruction. This program is unique because it is based on the authors own instructional model that was specifically created for teaching Chinese as a second language. ECTutor is intended to help the learner develop a solid background in basic Chinese. Although it also teaches the learner to speak Mandarin Chinese, its emphasis, however, is on the written language. ECTutor differs from other Chinese language programs in at least the following ways: First, you learn Chinese one step at a time. Each step is small, gradual, and manageable. You will never be overwhelmed by the amount of material to be learned at any given time. In fact, each step consists of no more than! three new characters. Second, learning is very precise, you know exactly what to expect and what to accomplish. Since the program is self-paced, you can move as fast as you can. Or you can take as much time as you want to thoroughly learn the material provided in any given step. Third, learning is highly structured and systematic. By design, each Chinese character in the learning sequence has a special role to play: to build up and expand your language network. Thus, you dont just learn the characters or words in isolation; you learn them as the necessary components in the formation of a network of links, connections, and associations. It is assumed that the more links you have in your language network, the more efficient

you will become in the acquisition of the Chinese language. Other features of this self-study or tutorial course include the following: 1. Shows both traditional and simplified characters in the same course. 2. Emphasizes all four areas of language learning: reading, writing, speaking, and listening. 3. Offers a variety of learning tools, exercises, and tests. 4. Shows several different ways to learn a Chinese character. 5. Uses diagrams and boxes to explain sentence structures. 6. Includes both pinyin and zhuyin in the Mandarin version. 7. Provides templates for printing hollow Chinese characters. 8. Provides numerous logical cues and examples to facilitate learning. 9. Is based on sound learning and instructional principles. System Requirements: Windows 95 or higher. 100 MHZ or faster 4xCD-ROM drive or faster. Speakers Note: Based on all models tested, the Easy Chinese Tutor CD-ROM is compatible with Windows XP. In the event that it doesn't work on your own computer, please first make sure that you have followed the instructions provided on how to start Easy Chinese Tutor. If it still doesn't work, please feel free to return it to the seller for refund.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
