before ebooks became popular. But I was never satisfied with the sales I was getting. So, I buckled down and started learning how online book marketing really worked. This took me through half a hundred expert ebooks, thousands of web-pages, and countless real-world tests. I figured out how to do this for little or nothing more than what I already had. I found out you dont have to have fancy equipment or programs to create your books. And that time-consuming Social Media and expensive advertising doesnt sell your books - but applying these discoveries will. In my tests, I started routinely getting sales from books which had sat dormant for years. You dont have to spend the months I did to work this all out. Or buy all the books I have just to compile their hidden methods. Now this one book tells you all these secrets, so you can get your booksales rocketing, too. But dont take my word for it - click on the Look Inside and preview it for yourself! UPDATE: New chapter added on book launch strategies that take advantage of leveraging social networks. This is new material from recent research - and not found in any other self-publishing book, manual, or guide. These new approaches can increase your audience multiple times, as well as your booksales. This explains why some established authors have instant bestsellers with no real advance marketing. Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
