

Communication and Health: Systems and Applications (Routledge Communication Series)

This volume examines this rapidly growing and changing field by applying a unified framework that integrates both interpersonal and mass communication investigations into theoretical and applied issues. Using a systems perspective as the organizational framework, relevant issues in the communication of health care, ranging from micro to macro levels, are discussed. The contributors recognize communication as a major factor affecting health today and therefore go beyond examinations of health communication as simply a dissemination of information regarding diseases, diagnoses, and treatments to show it as a much larger and more complex field with applications to all levels and forms of communication.

Communication and Health has as its three main objectives:

- * providing a comprehensive, detailed, and up to-date picture of health communication
- * applying an integrated, logical structure to the field
- * making a clear, strong statement regarding the state of health communication and examining its future prospects

The contributors address such issues as provider-patient communication, health care teams, health care organizations, public health campaigns, and health education, and then discuss the factors that affect the processing of health information. Also included are examinations of changes in communication use within interpersonal, small group, and organizational health care contexts as well as the use of mass media and other sources for public health campaigns and for raising public awareness of health issues on a day-to-day basis. Communication and Health fills a void in current literature on this field by serving as both a reference for professionals and researchers and as a textbook for advanced undergraduate and graduate level students in a multitude of courses.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
