

Comparatively Speaking: Communication and Culture Across Space and Time (SAGE Series in Communication Research)

This book provides an authoritative state-of-the-art review of comparative approaches to communication research in the context of time and location. Perspectives unique to mass, interpersonal, political, cultural and organizational communication are explored, while descriptions of well-known empirical projects reveal how collaborations worked and how problems were addressed across different periods and cultures. Comparatively Speaking serves both as a student text and as a stimulus to further research in comparative communication research.

Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
