

The Climate Change Controversy: A Technical Debate in the Public Sphere

The scientific consensus on climate change is not recognized by the public. This is due to many related factors, including the Bush administrations science policy, the reporting of the controversy by the media, the publics understanding of science as dissent, and the differing standards of argumentation in science and the public sphere. Al Gores An Inconvenient Truth was produced in part as a response to the acceptance of climate dissent by the Bush administration and achieved a rupture into the public sphere by bringing the technical issue forward for public deliberation. Rather than closing off, the rupture has been sustained by dissenters through the use of argument strategies designed to foster controversy at the expense of deliberation. This makes it incumbent upon rhetorical scholars to theorize the closure of controversy and policymakers to recognize that science will not always have the answers.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, virtual reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
