

The Effects of De-Regulation on the US Electric Power Market

Examination Thesis from the year 2010 in the subject Economy - Theory of Competition, Competition Policy, grade: 2,0, Friedrich-Alexander University Erlangen-Nuremberg (Institut für Wirtschaftswissenschaften), language: English, abstract: Thomas Edison and Joseph Wilson Swan revolutionized the use of electricity by inventing the light bulb in 1879 (cf. Center for Solid State Science). With this new invention people finally had the possibility to light their homes and streets at night. Obviously this entailed a wide range of advantages in terms of the standard of economy, security, comfort and much more. However, with the invention and spread of the light bulb another problem occurred simultaneously: the need for nationwide electric power supply. Due to the lack of devices, there had been no need to supply power on the large scale before the invention of the light bulb. Now a solution for providing the populace with electric power had to be found. It was again Edison, who therefore laid the foundation, three years after he had in-vented the artificial light. Simultaneously he intended, as can be deduced from the quotation above, that electricity became available and affordable for every-one.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, viraal reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
