

Stardust Dancing: A Seekers Guide to the Miraculous

Nothing is more amazing than the true story of your life. In *Stardust Dancing: A Seekers Guide to the Miraculous*, Paul Tobolowsky, M.D. explores the fascinating chain of improbable events and processes that have resulted in You. While a medical doctors career primarily revolves around the imperfections that are part of being human, Dr. Tobolowsky uses that same medical knowledge to tell the other side of the story, the mystery and miracle of our lives. Hidden within the so-called ordinary is the astounding. The atoms on a small planet in a vast universe have clustered together to not only form you, but also give you the power to appreciate how miraculous you are. SMU science professor Dr. Bonnie Jacobs describes *Stardust Dancing* as ...equal parts information and inspiration. Methodist minister Fred Durham says, Each chapter is like a meditation. An audience member at one of Dr. Tobolowskys talks described the books information as life-changing. Take the literary voyage - discover yourself.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
