

Dialogicality and Social Representations: The Dynamics of Mind

This book develops a theory of social knowledge based on dialogicality (the capacity of the human mind to conceive and communicate social reality in relation or opposition to otherness) and the theory of social representations. It argues that dialogicality is the sine qua non of the human mind and change is at the center of all social phenomena. Ivana Markova's new book brings together the concept of dialogue and social knowledge and will be an important contribution to social psychology and discourse and communication studies.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
