

Graduated Exercises in Conversational Japanese, Vol. 1 (Classic Reprint)

Excerpt from Graduated Exercises in Conversational Japanese, Vol. 1 This book consists of three parts: Part I, Graduated Exercises in Conversational Japanese; Part II, Elementary Grammar of the Japanese Spoken Language; Part III, Vocabulary of Common Japanese Words. The learning of a language is a complicated process. In general it may be said to consist of two parts, theory and practice. Theory refers to the knowledge of words, their peculiarities, special uses, inflexions, how they depend on each other and how they are combined in a sentence. Elementary notions on these subjects as regards Colloquial Japanese will be found in Parts II and III of this work. Practice consists in learning to express oneself without difficulty or hesitation, in acquiring a correct pronunciation and in training the ear to understand the language as spoken by the natives. Practice, of course, cannot be learned from books; however, the Exercises in Part I, supply models and materials for a great number of sentences which can be used in real life. The student is strongly advised to speak Japanese or try to speak Japanese on every possible occasion: to servants, rikisha-men, tramway-conductors, shop-attendants, etc.; and to continue speaking Japanese even when the other person answers in quite good English. Get as much practice in Japanese as you can, and don't go about giving free lessons in English. The author suggests that the student should begin with the Exercises, studying only such parts of the Grammar as are indicated at the beginning of each Exercise and consulting the Vocabulary when necessary. No particular method of study is recommended in detail; but the author believes that the pupil should repeat each sentence after his teacher several times until he can say it with a fairly good pronunciation and a reasonable degree of fluency; he should also have a knowledge of what the sentence

means while he is saying it; the lesson should not be considered as known until he can do all the above with his book closed. By the time the student has finished the Exercises, he will have gone all through the Grammar, and he should then, if he has the courage, read the Vocabulary, which contains many useful phrases not found in the Exercises, and many hints regarding the use of common words, which frequently are a source of trouble to the beginner. The Japanese Exercises were made in Japanese by a Japanese under the authors direction; they are in no sense a translation of the English; on the contrary, the English is a translation of the Japanese. It should be clearly understood that the version given is only one out of many equally good and correct translations which might be given. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
