

# An Economic History of Europe 1760-1930

A history of the rise of industrialism in modern Europe, containing a description of the revolutionary changes which transformed industry, commerce and agriculture at the beginning of the last century, with an account of their reactions on the political and economic condition of the chief European nations. The social problems created by this momentous revolution are discussed in detail, and a historical survey is given of the various attempts to correct the evils of industrialism, on the one hand through state intervention by means of poor laws, factory laws, schemes of social insurance, etc., and on the other through voluntary effort as manifested in movements like trade unionism, co-operation, profit sharing and co-partnership. Post-war developments such as the Russian Revolution and international labour legislation are also described in detail and depth. This book was first published in 1930.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
