General Observations.--Initial consonants are Always Sounded in French; and, when several consonants begin a word, they are all pronounced. Even in words beginning with sce, sci, or scy, the s, which is said to be alone sounded, is certainly much strengthened by its association with the c. When two or more words are intimately connected in sense, no solution of continuity in the flow of the voice should occur, and the words must be uttered one after another in one continuous stream, as if they formed but one long word divided into as many syllables as there are vowel sounds in the whole; therefore, when the first word ends with a consonant and the next begins with a vowel, the final consonant of the first word, which otherwise would be silent, is carried to the second word, with which it is fully sounded, becoming, de facto, the initial letter of that word. We have another and more striking illustration of this resumption of sound by consonant letters, in the case of suffixes, or letters added, for whatever object, to some words. For instance, in doigt, grand, vingt, petit, &&, the final t or d is silent; but in doigtier, grandeur, vingtieme, petitesse, &c., it is fully sounded, and begins the syllable The shortest pause, whether indicated by the punctuation, or not indicated at all, naturally prevents the linking of words together. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
