Simple Massage Anyone Can Use  
to Bond with Their Cats

Heidi L. Schlatter

Is that new rescued kitty you adopted not very friendly? Does he run from your children? How to teach young children about gentle and kind touch on cats. Young children can learn about how a kitty thinks and feels. They can learn acceptable behavior around their kitties and other animals and how that can result in a furry family member thats crazy about them!

The lessons within can also show some helpful techniques for adults, and children over the age of 8, to help adult stray or rescued cats brought into a home to learn trust and the value of kind touch. Simple strokes are described to use - to achieve these outcomes. And they are simple enough for even toddlers to learn.

Even though not written in technical detail about muscles,etc., the strokes described can still have a positive effect on your cats health through stress reduction and increased circulation. And best yet, you can develop strong trust and bonding between you and /or family members with your cats, and relaxation for all! Teach Children and Help Animals!

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
