

Reading Acquisition in India: Models of Learning and Dyslexia (Research in Applied Linguistics series)

The sixth in the series on Research in Applied Linguistics, this is a ground-breaking study which presents a phonological analysis of Brahmi and its modern derivatives. It closely examines India's ancient cultural-linguistic background, particularly the Vedic Culture of oral tradition, and relates this scholarship to current research and theory in linguistics, neurobehavioral sciences, and special education. The author also provides an empirical understanding of reading acquisition by children with a particular focus on those facing poverty, a toxic environment, and the deprivation associated with low caste status. The book is a departure from current neuropsychological research which is limited to the middle-class dyslexic child. It argues the need for a multidisciplinary approach which takes into account the effects of poverty, socioeconomic deprivation and environmental toxicity on reading acquisition among children from deprived groups. Purushottam Patel discusses a number of important issues including:- The linguistic context and principles underlying the Brahmi script. - The reasons behind literacy emerging as a part of natural language development, especially in an oral culture. - The cultural habits surrounding reading. - The importance of the living environment to literacy development. - The need for multidisciplinary research, with an emphasis on neurobehavioral teratology.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, virtual reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
