

The Art of Ancestor Hunting: A Guide to Ancestral Research and Genealogy

There is no more fascinating subject in which a person may become occupied than an examination into the history of his ancestry. The study of human beings is an interesting one, especially when they are the particular human beings from whom the student has derived his existence, his character, his likes and dislikes, and those elements which differentiate him from every other human being and constitute him an entity with an individuality. The purpose of this books are two-fold: 1) To bring to the attention of people the desirability of undertaking ancestral and genealogical research, and to show them the enjoyment that is to be derived in doing it the pleasure there is in living over with the forefathers in family connection their lives of adventure, toil and accomplishment. The satisfaction of seeing themselves as their lives reflect the lives of others who have transmitted to them by blood something of strength and of weakness, of character and the peculiarities of human nature. To understand the lives of today in the light of the lives of yesterday, and to interpret the characters of yesterday in those of today. 2) To show to the interested person of average mental ability how very easy it is to do such research work himself, thereby satisfying his longings and answering his ancestral questions himself without any considerable outlay of money, and at the same time opening an avenue of activity from which he will derive the keen enjoyment which always accompanies this sort of work. To take the novice step by step from the very beginning of his ancestral queries through the various phases of the search until he can solve his ancestral problems as successfully as could the professional genealogist. To outline a plan of both genealogical and ancestral research and to work it out to the result of producing either an ancestral history or a genealogy, whichever it is that he assays to

accomplish.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
