

# Interfaces of the Word: Studies in the Evolution of Consciousness and Culture

Drawing on a wide range of disciplines—linguistics, phenomenological analysis, cultural anthropology, media studies, and intellectual history—Walter J. Ong offers a reasoned and sophisticated view of human consciousness different in many respects from that of structuralism. The essays in *Interfaces of the Word* are grouped around the dialectically related themes of change or alienation and growth or integration. Among the subjects Ong covers are the origins of speech in mother tongues; the rise and final erosion of nonvernacular learned languages; and the fictionalizing of audiences that is enforced by writing. Other essays treat the idiom of African talking drums, the ways new media interface with the old, and the various connections between specific literary forms and shifts in media that register in the work of Shakespeare and Milton and in movements such as the New Criticism. Ong also discusses the paradoxically nonliterary character of the Bible and the concerted blurring of fiction and actuality that marked much drama and narrative toward the close of the twentieth century.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
