

Interpersonal Communication Through the Life Span

Communication scholars increasingly recognize the influence life stages have on communication. This book presents concepts from a unique life span orientation so that readers can gain a better understanding of the impact the life span has on interpersonal communication and relationships. The authors include an abundance of current theory and research and also incorporate scholarship from psychology and sociology. Section Two is organized around four specific life stages: early to middle childhood--addresses topics such as emotional and conflict competence; adolescence to young adulthood--examines identity, self-disclosure, how relationships form, and relationships outside the family; adulthood to middle-adulthood--covers marital and family communication, and gender issues; elderly--looks at multi-generational issues, grandparenting, communication challenges for the elderly, and romance and intimacy for the elderly.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
