

## Inventing the Dream: California through the Progressive Era (Americans & the California Dream)

This second volume in Kevin Starrs passionate and ambitious cultural history of the Golden State focuses on the turn-of-the-century years and the emergence of Southern California as a regional culture in its own right. How hauntingly beautiful, how replete with lost possibilities, seems that Southern California of two and three generations ago, now that a dramatically different society has emerged in its place, writes Starr. As he recreates the lost California, Starr examines the rich variety of elements that figured in the growth of the Southern California way of life: the Spanish/Mexican roots, the fertile land, the Mediterranean-like climate, the special styles in architecture, the rise of Hollywood. He gives us a broad array of engaging (and often eccentric) characters: from Harrison Gray Otis to Helen Hunt Jackson to Cecil B. DeMille. Whether discussing the growth of winemaking or the burgeoning of reform movements, Starr keeps his central theme in sharp focus: how Californians defined their identity to themselves and to the nation.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
