

Language in South Asia

South Asia is a rich and fascinating linguistic area, its many hundreds of languages from four major language families representing the distinctions of caste, class, profession, religion, and region. This comprehensive new volume presents an overview of the language situation in this vast subcontinent in a linguistic, historical and sociolinguistic context. An invaluable resource, it comprises authoritative contributions from leading international scholars within the fields of South Asian language and linguistics, historical linguistics, cultural studies and area studies. Topics covered include the ongoing linguistic processes, controversies, and implications of language modernization; the functions of South Asian languages within the legal system, media, cinema, and religion; language conflicts and politics, and Sanskrit and its long traditions of study and teaching. Language in South Asia is an accessible interdisciplinary book for students and scholars in sociolinguistics, multilingualism, language planning and South Asian studies.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
