

Lectures on Quantum Electronics (Advances in Science and Technology in the U S S R Technology Series)

Lectures on Quantum Electronics presents a series of complete discussions covering the fundamentals of quantum electronics. Topics considered include physical principles of coherent amplification of light and laser oscillation; descriptions of well-known lasers such as helium-neon, colour-centre, dye and free-electron lasers; comparisons and contrasts of specific laser systems; and theory and practical realization of laser radiation tuning. Worked problems follow each lecture in the book.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, virtual reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
