

Mo: The Talking Dog

A puppy born without the ability to bark; A veterinarian who believes that dogs could talk, given the right surgery; A scientist who specialises in growing tissue. Add these together and the result is a dog with a unique ability and an attitude problem. That means a confused family, offended neighbours, and some very scared cats! ===== This is a book for children aged around 8-12 years of age. It is a happy story, with some mild danger. It addresses bullying and settling in at a new school. ===== Reviews: This is one of those books that you just dont want to put down. From the first page it was great. My kids enjoyed listening to this and it prompted a very nice lengthy discussion after we were finished with it. I would highly recommend this book to parents. Although this is a longer book, I found it a nice way to spend an afternoon with my kids. This is a perfect family book. Who wouldnt want to have a speaking dog and learn to know what his/her furry friend really thinks? The book also gives a lot of opportunities for (grand)parents that read this book with their (grand)children to start conversations about so important topics like bullying in an easy way. Highly recommended! =====

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
