

Technological Determinism and Social Change: Communication in a Tech-Mad World (Communication, Globalization, and Cultural Identity)

The aim of this book is to shed new light on this theoretically and practically significant issue, and questions the role of technology and culture in social change. It challenges us to reconsider and rethink the impact of new information and communication technologies on civil society, participatory democracy and digital citizenship in theoretical and methodological contributions, through the analysis of specific cases in Australia, Bangladesh, Belgium, China, Colombia, Kenya, Netherlands and the United States. Access to information and communication technologies is a necessity, and the importance of access should not be trivialized, but a plea for digital literacy implies recognizing that access is the beginning of ICT policies and not the end of it. Digital literacy requires using the Internet and social media in socially and culturally useful ways aimed at the inclusion of everybody in the emerging information/knowledge society. Technology matters, but people matter more.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, virtual reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
