

# Russian Grammar: For Class and Reference Use, a Progressive Method of Learning Russian (Classic Reprint)

The living Slavonic languages are Russian, Polish, Czechoslovak, Serbo-Croatian, Slovene, Wendish and Bulgarian, all so closely related that a knowledge of any one of them is a key to an easy comprehension of all the others. The Russian language is difficult and at first sight, irregular, and yet many obstacles disappear when the student becomes familiar with the phonetics and the grammatical basis. Russian is hard to acquire at first, mainly owing to the somewhat confusing phonetics; viz., the unlikeness of many sounds to those of English and the changes in spelling of numerous forms, when certain sounds are combined. Added to this is the fact that the accent does not fall regularly on any one syllable, but moves in the inflected forms of the same word so arbitrarily, that the stress of each form must be learned rather by association than by memorizing. In the present grammar, the compiler has tried to lead the learner more briefly than has been done in some other grammars of Russian, by progressive steps through the mazes of Russian morphology. Most of the examples given are intended for reference and not to be learned by heart at the outset. No attempt has been made to expound the higher style, poetical metre, etc., as these can be learned only after the beginner is well equipped grammatically. It is absolutely necessary to train students first in the accidence, teaching them to recognize and use, both by sight and sound, the inflections and conjugations. This has been attempted in the present work by means of exercises in Russian at the close of each lesson. (Typographical errors above are due to OCR software and do not occur in the book.) I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
