

Smartsourcing: Driving Innovation and Growth Through Outsourcing

Outsourcing is the most popular movement of the new global business economy. In fact, the typical executive will soon spend one-third of their budget on outsourcing! Smartsourcing is the next evolution in outsourcing. Traditional outsourcing reduces costs by moving the work to where the least expensive workers are. While that may cut costs, it simply replicates the status quo. Smartsourcing goes a step further by showing companies how to partner with service providers to not only cut costs, but also increase innovation across the full spectrum of their business. Smartsourcing is the first book on the market to be ahead of the curve on one of the most important shifts in business today.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
