Excerpt from Ground Water Levels and Precipitation Records in Los Angeles, San Gabriel, and Santa Ana River Basins and Antelope Valley, and Water Supply Summary for Southern Portion of California, 1953 This report is one of a series begun in 1932, in recognition of the need for collecting and publishing basic hydrologic data for use in the continuing study of water problems in southern California. These problems result, in part, from the wide seasonal variation in the magnitude of the natural water supply and the ever-increasing net use of water, accompanying the increase in population and urbanization. Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
