

Economic Growth in Japan and the USSR (Economic History)

In terms of output, the USSR and Japan account for one-fifth of the world's economy, occupying second and third places behind the United States. Japan has the world's fastest growth of per capita income and the USSR has not lagged far behind. But a century ago they were static feudal societies. This study analyzes the policies which enabled them to transform their economies and to catch up with the developed world. The strategies of the two nations adopted have been very different: Japan has maintained small farms and factories, developed a labor-intensive technology, and has successfully penetrated the world export markets. The USSR, on the other hand, has created giant farms and factories and remained fairly isolated from world trade. Since 1945 the USSR has devoted one-eighth of her resources to military purposes, Japan practically nothing. In *Economic Growth in Japan and the USSR*, Angus Maddison offers a comparative analysis of the growth experience of these two countries that greatly enlarges our knowledge of the development process. A better understanding of their past experience can be particularly illuminating and relevant for economic policy in developing countries today. This classic text was first published in 1969.

Welcome to the blog of Joan le Grande. I'm changing the blog to English so forgive me the Dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, virtual reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
