The urge to question is natural for small children just ask any parent. But few of us are aware that it is also one of the most vital tools for success. In *The Power of Why*, Amanda Lang shows how curiosity and the ability to ask the right questions fuels innovation and can drive change not just in business but also in our personal lives. Weaving together the latest research with in-depth profiles of innovators from around the world, Lang explores how to harness and develop the power of curiosity. She reveals how a major retailer set out to discover what really makes men happy and was stunned by the results. She finds out why, at one particular hospital, nurses think it's better if they don't wash their hands. She learns why the most common methods of brainstorming don't actually work and discovers a new soccer ball that could change the world. A book that challenges conventional wisdom and offers practical, inspiring advice, *The Power of Why* shows how it's possible to reignite your innate curiosity and overcome long-standing barriers leaving you more creative, productive and fulfilled in your job and happier in your relationships.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
