

Reading in Content Areas: Strategies and Reading Success, Level B - Teachers Resource Manual

Use this program to teach students reading strategies for comprehending informational text in major content areas. Reading in the Content Areas is a four-volume program that helps your students learn reading strategies for each of the four major content areas: Language Arts, Social Studies, Science, and Math. In addition, students learn how to understand non-fiction through reading comprehension clues and visuals, such as maps, charts, and graphs. The program contains activities for use before, during, and after reading to support all learners. Reading Level: 4-7 Interest Level: 6-12 Empowers all students by giving them potent strategies for reading, studying, and learning. Includes strategies for dealing with content-area vocabulary. Eases anxiety by showing students how to apply strategies they've already learned as they read, write, and learn.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
