

Words and Structure (Center for the Study of Language and Information - Lecture Notes)

What kinds of words can exist in natural languages? How are sentences constructed? What is the relationship between a word and the sentence in which it appears? How do language learners figure all this out? Presenting over a decade of original research, *Words and Structures* collects four influential papers that address the theory of words, the structure of sentences, and the relationship between the two. Jane Grimshaw sheds new light on the fundamental questions of the nature of word meanings, sentence structure, and language acquisition. Those interested in the puzzles of language learning but dissatisfied with current theories and models will find this an indispensable volume on the subject.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
