

Teaching the Library Research Process

This practical resource gives academic librarians and school media specialists a complete instructional program for introducing students to the process of library research. The program has been tested and proven as an exceptionally effective method for guiding students in independent learning using library resources. The second edition of this highly regarded text incorporates use of newer library technologies into innovative process strategies, instructional plans, and coaching techniques. Seven basic steps of the research process are identified and described. Ready-to-use activities with worksheets are provided to help students achieve the specific task to be accomplished at each stage. In many ways the book is more timely than when the first edition was published in 1985. The library research process approach to learning integrates subject area content with essential information processing skills, preparing students to address real problems in real-world contexts in the information age. Cloth edition previously published in 1994. Paperback edition available April 2002.

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! Categories Comics Games Playstation 4 Wii U Lifestyle Posted by Joan le Grande in Games, Playstation 4 Leave a comment Tagsexperience, first look, Games, Playstation 4, Playstation VR review, ps4 VR review, virtual reality YES YES YES. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
