

## The Fiction Writers Handbook

Compiled with all new fiction-writers in mind, this book offers advice on both the novel and the short story. A section on techniques and principles covers such topics as conflict, background, characteristics, dialogue, pace, theme, viewpoint, symbolism, reader identification and flashback, and illustrates them with examples, where appropriate. Further sections deal with the construction of different types of novel and advice on how to get them published, structure and atmosphere in short stories and how to find a market for them, and guidance on rewriting, presentation, length, writing methods and grammar. The author teaches creative writing and her other books include *The Essential A-Z of Creating Writing*.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
