

Travels in the Interior of Africa - Two Volumes

Mungo Park set off from his home in the Scottish borders in May 1795 at the age of 23 to discover the course of the Niger river in west Africa. When he reappeared in England more than two and a half years later, he had been presumed dead, and the tale of his perilous journey published in 1799 was greeted with great acclaim. Travels in the Interior of Africa provided Europeans with one of the first detailed descriptions of the geography and peoples of the African continent. The story of his remarkable journey is told with extraordinary modesty and clarity, and it remains as vivid and readable today as when he first wrote it. Park returned to West Africa on a second journey in 1805, but he failed to return. In his last letter he declared his intent to discover the termination of the Niger or perish in the attempt. He drowned in the Niger attempting to escape an attack by natives. I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
