

Twentieth-Century Roots of Rhetorical Studies:

Kuypers, King, and their contributors explore the conception of rhetoric of eleven key American rhetoricians through analyses of their lives work. Each chapter provides a sense of that scholars conception of rhetoric, be it through criticism, theory, or teaching. The communication discipline often highlights the work of others outside the discipline; however, it rarely acclaims the work of its own critics, teachers, and theorists. In this collection, the essays explore the innate mode of perception that guided the rhetorical understanding of the early critics. In so doing, this work dispels the myth that the discipline of Speech Communication was spawned from a monolithic and rigid center that came to be called neo-Aristotelianism. Scholars and researchers involved with the history of rhetoric, rhetorical criticism and theory, and American public address uill find this title to be a necessary addition to their collection.

I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
