

## When Santa Turned Green

A creative holiday story that introduces kids to environmental awareness with ways that they can make a big difference. Its November up in the North Pole. Everything's going along smoothly at Santa's workshop until he discovers a leak in his roof. Santa soon learns that this little leak is connected to a far bigger problem. The North Pole is melting because of something called global warming! Faced with the reality of what this could mean for Christmas, not to mention the planet and the future, Santa is determined to turn things around. To do so, he calls upon the people he knows better than any other—the children. Much to Santa's joy, they respond in a way that makes all the difference . . . in the world. When Santa Turned Green helps even the youngest child grasp the importance of caring for our planet and solving the climate crisis. Former Vice President Al Gore

Welcome to the blog of Joan le Grande. I'm changing the blog to english so forgive me the dutch articles before. I already translated a few, keeping it up! Anyway, stay tuned for lifestyle articles and reviews about games or other nerdy stuff. Enjoy! I'm super hyped about the VR, but you obviously knew that already because of my last blogpost. There were a few hiccups because I ordered it online and I was working during the time it came. I stressed, freaked, jumped and finally gave up on the thought I got to play on the day it came out. But luck was on my side and when I got home, 20 minutes later the VR glasses arrived! In this post I will take you with me on my first experience with virtual reality. Was it as awesome as I hoped? Or is nauseating and not really my cup of tea? Read and find out!
